

Update the Instant Team Sessions Applet (Web Client)

Neither the Instant Team Sessions Service nor the Domino Server needs to be restarted to complete this update.

1. On the Domino server which hosts Instant Team Sessions database (typically named: itsessions.nsf) navigate to <Domino_Server_Install_Folder>\Domino\data\domino\html\chatbin
2. Back-up the current Web Client JAR files:
 - a. InstantTeamSessions.jar
 - b. Places.jar

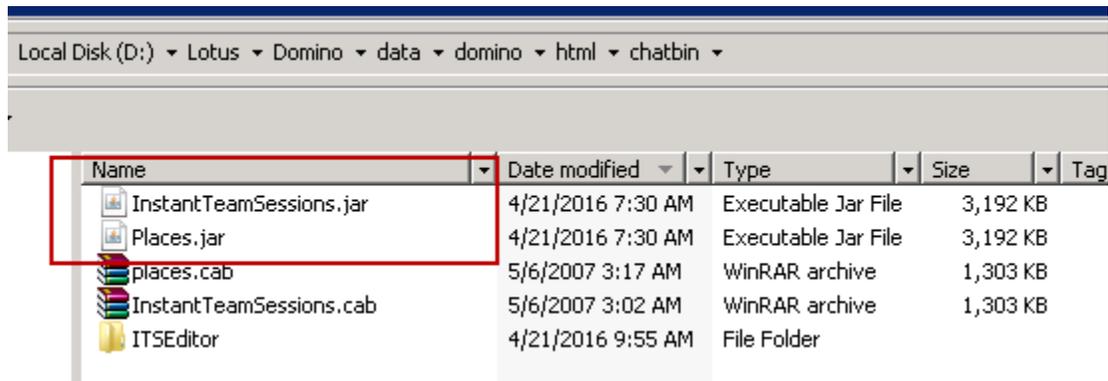

Figure 1 - Backup JAR files

3. Extract the updated JAR files from the downloaded zip file and replace the current Web Client JAR files
 - a. InstantTeamSessions.jar
 - b. Places.jar

Verify the updated certificate details is shown when accessing the applet (web client).

1. Open the link to the applet (web client)
2. When prompted "Do you want to run this application", select "More Information"

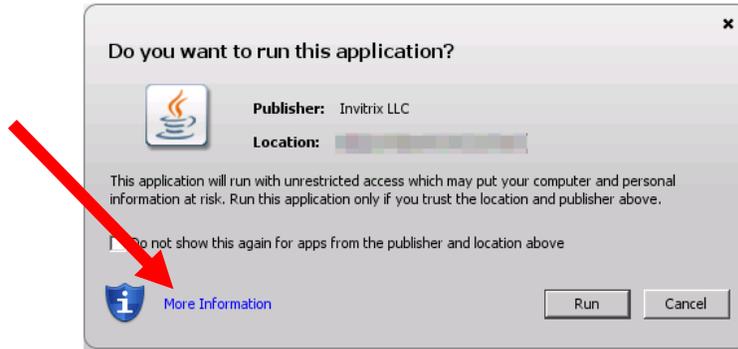

Figure 2- Select "More Information"

3. On the "More Information" screen, select "View Certificate Details"

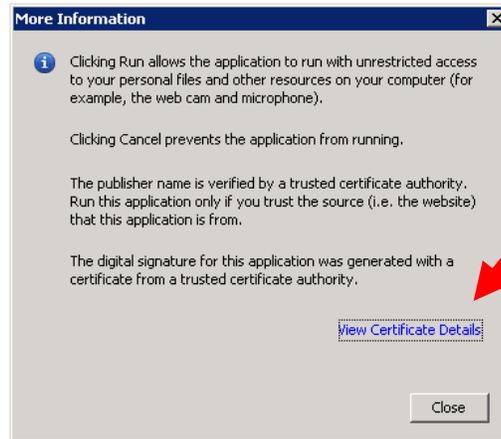

Figure 3 - Select "View Certificate Details"

4. In the Details, the validity should now show the new date
